

FA223S SINGLE-BUTTON WATER-RESISTANT PENDANT

This 900MHz, single-button, water-resistant pendant is our smallest, lightest, and most versatile pendant. Weighing less than 1.4 ounces, it comes with a neck cord and belt clip and can be easily converted by the end user. With the single-button, “press and hold” activation and a compact design, it is ideal for assisted living installations. Like all Inovonics Wireless pendants, the FA223S features a fully supervised radio link to help ensure reliability.

FEATURES	BENEFITS
➤ Fully supervised Inovonics Wireless 900MHz Frequency Agile™ transmitter.	➤ Supervise portable pendants to help ensure reliability. Helps provide true security to your customers.
➤ Water-resistant design.	➤ Reliable operation even if worn in moist environments
➤ Large alarm button with alarm activation delay	➤ Easy to use with an activation delay to reduce false alarms
➤ Low battery warning before battery depletion	➤ Two-week warning allows for scheduled battery replacement
➤ Flashing LED indicator during alarm activation	➤ Shows user that pendant is transmitting
➤ Field-replaceable, 3V lithium battery	➤ User-replaceable battery, (1-2 years typical).

FA223D DOUBLE-BUTTON WATER-RESISTANT PENDANT

The FA223D is similar to the FA223S but designed to meet the specific protection needs of patrolling guards, bank employees, and retail store employees. The twobutton design provides protection against false alarms because both buttons must be pressed simultaneously to initiate an alarm transmission. In addition, the dimmed LED minimizes observation of alarm activation during duress situations. The FA223D is available in dark gray and includes a customer-replaceable 3V battery. It has the same optional accessories as the FA223S.
